LEADING THE WAY AS
INDIA'S
FIRST ACRYLIC LAMINATE MANUFACTURER

ABOUT US

India's first premier Manufacturer of Acrylic Laminates

Skylite Laminates stands as a pioneering force in the Indian industry, being the first manufacturer of high-quality acrylic laminates in the country. With an unwavering commitment to innovation, craftsmanship, and customer satisfaction, Skylite has set new standards in the laminates market.

At Skylite, we combine cutting-edge technology of Italy with artistic finesse to produce a diverse range of premium acrylic laminates that cater to various design needs. Our products are crafted with precision and attention to detail, ensuring unmatched durability and aesthetic appeal.

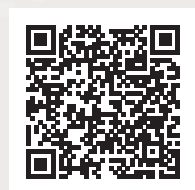

Driven by a passion for excellence, Skylite continually strives to push boundaries and redefine industry norms. Our dedication to quality, sustainability, and customer-centric approach sets us apart as a trusted name in the realm of acrylic laminates.

We are also one of the leading manufacturer of polycarbonate sheets for various applications. We manufacture Polycarbonate sheets (Solid /Embossed /Crystal), Polycarbonate profiled sheets, Polycarbonate Ventilator Base, Polycarbonate Dome , Polycarbonate Pyramid and Self Drilling Screws. We have developed a wide infrastructural unit that is situated at Barwala Distt Panchkula (Haryana),Baddi(Himachal Pradesh), Bangluru (Karnataka). To inquire about customization options for Skylite laminates, you can reach out to our customer service or sales representatives directly.

Experience the difference with Skylite Laminates - where innovation meets elegance, and quality knows no compromise.

TIPS FOR A BETTER INSTALLATION AND MAINTENANCE :

1. Ensure the originality of products by checking the sticker on it before buying any of Skylite Acrylic Laminates.
2. Once you receive the product, check no product has been damaged in the transportation. Only after inspecting, proceed further for installation.
3. To avoid bubbles or wavy surface later, before installation, make sure the substrates (MDF, Particle Board, Plywood) is in good condition. Also check the surface is even and of similar thickness.
4. There should be no dust or grease on the surface. So, clean it with the help of a cloth before putting Skylite Acrylic Sheet on it.
5. Use water based adhesives only and stir it well before using. Remember : Don't mix water in it.
6. To get the best bonding forever, apply the adhesive uniformly using a brush, roller or adhesive spreader on both the surfaces, base and laminate sheet.
7. To be able to remove air between the laminate sheet and the base, keep minimum 2mm gap between two laminates while applying. Use soft pinch roller or normal pressing technique and the pressing should be done from the middle of the panel and move towards the sided line and corners.
8. Full bonding strength is achieved only when given sufficient amount of pressing after adhesive application that is, minimum 12 to 15 hours.
9. After installation, remove the protective film within 7 to 10 days.

DO THIS :

1. Store the laminates in climate below 30 C temperature .
2. Clean the surface with water and with a non abrasive cloth. We recommend to clean with soft micro fiber cloth.
3. Use glossy surfaces only on vertical applications.

DON'T DO THIS :

1. Do not share Skylite Acrylic sheet in a roll form.
2. Avoid using cleaners made with alcohol, solvent, petrol or oil. Using such cleaners may damage the surface of laminates.
3. Do. not use thinner on the surface of laminates.
4. We strictly do not recommend to use Skylite Acrylic Sheets for outdoor applications. UV rays may change the shape of laminates.

AVOID AIR BUBBLES OR WAVES AFTER APPLICATION :

- Never mix water to adhesive. Use only water based adhesive.
- Surface must be even.
- Uncertain and frequently changing weather may cause laminates to absorb moisture and lose it again resulting in air bubbles.
- If Acrylic Laminates of size more than 8'*2* are used in paneling, they may end up having air bubbles.
- Lack of the time given to pressing leads to having air bubbles.
- Acrylic laminates should be kept evenly straight. If the laminates are in roll form, It should be kept straight for minimum 48 hours and then can be pressed for better results.

YOU ARE IN THE RIGHT HANDS!

Skylite laminate are manufactured with aesthetics and durability in mind. when used as recommended, our laminates will last through the years. Skylite laminates are easy to maintain. We design our sheets using the Typical internationally recognized technical standards.

- To remove more stubborn stains, use mild household cleansers, gently wipe down with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solution as these may damage the surface of the Acrylic sheets.
- Do not place hot cookware directly on the laminate. Prolonged exposure to temperatures above 30 degree Celsius may cause damage to the laminate surface.
- UV rays may reshape the laminate. Avoid outdoor applications.
- Have a thickness balance of +/- 10%

ACRYLIC SHEETS ARE THE BEST OPTIONS FOR BLENDING EDGES.

To achieve a smooth and sleek look with a clear and sleek edge bending, Skylite Acrylic sheets are the best solution. Gloss level is > 96 gloss points, and hence makes it a perfect classy choice. Monolithic look between board and edge gives it an again mastered finish. Also, there is a Wide range of colors combined with trending high gloss acrylic sheets. Acrylic edge- banding made with same colour foil of acrylic sheets keeps it sober.

MERGE WITH EDGES

Skylite acrylic sheets are a variety of eye- catchy and vibrant colours that can go with everything even with natural veneer.

To achieve a smooth sleek look, shiny and reflective surfaces like acrylic sheets are the solution. The gloss edging and bandings with Skylite protects orange peeling of the edges.

Scratch Resistance
Superior resistance to scratch
6H, abrasion and impact

Stain Resistance
Easy to clean with soap
& water

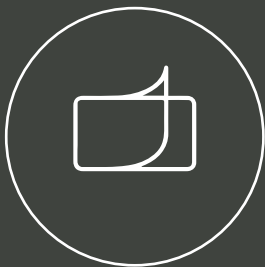

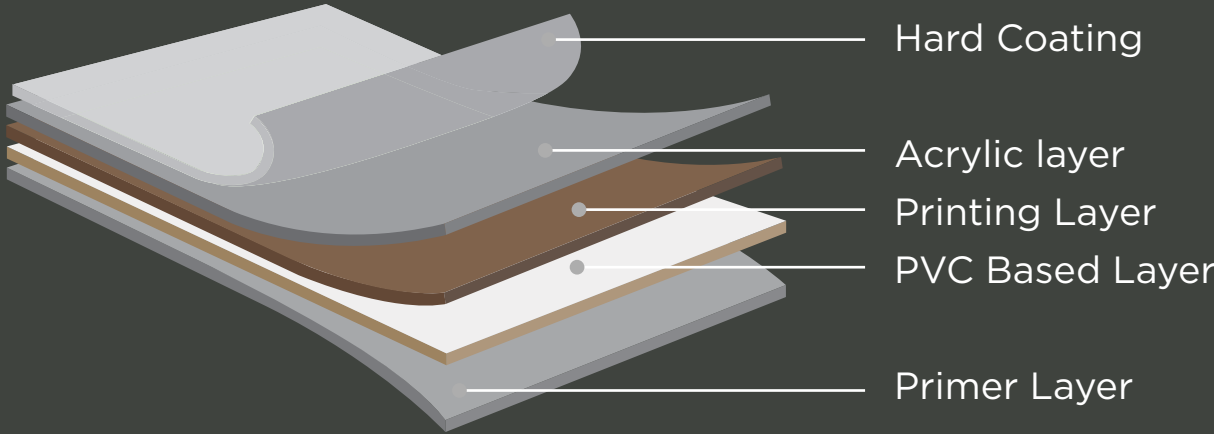

Superior Gloss
Maximum gloss level than any
other surface decor

Ideal for Vertical Applications
This decor is suggested for
vertical applications

- Kitchen Shutters
- Wardrobe
- Doors and drawer fronts
- Office spaces
- Wall panelling
- TV unit
- Furniture

Easy film removal
In 6 Or 7 Days Of
Application

Shake it well and lightly
spray on the surface.

Wipe the surface clean using a
light circular motion.

Please open the roll
immediately.
Do not pressurize while
opening roll.

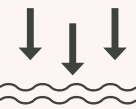

ABOUT WARRANTY

- Avoid air bubbles or waves after application:
- Never mix water to adhesive. Use only water based adhesive.
- Surface must be even.
- Uncertain and frequently changing weather may cause laminates to absorb moisture and loose it again resulting in air bubbles.
- If Acrylic Laminates of size more than 8'*2* are used in paneling, they may end up having air bubbles.
- Lack of the time given to pressing leads to having air bubbles.
- Acrylic sheets should be kept evenly straight. If the sheets are in roll form, It should be kept straight for minimum 48 hours and then can be pressed for better results.

CARE OF LAMINATES

- You are in the right hands!
- Skylite Decor are manufactured with aesthetics and durability in mind. when used as recommended, our laminates will last through the years. Skylite Decor are easy to maintain. We design our sheets using the Typical internationally recognized technical standards.
- To remove more stubborn stains, use mild household cleansers, gently wipe down with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solution as these may damage the surface of the Acrylic sheets.
- Do not place hot cookware directly on the laminate. Prolonged exposure to temperatures above 30 degree Celsius may cause damage to the laminate surface.
- UV rays may reshape the laminate. Avoid outdoor applications.
- Have a thickness balance of +/- 10%

REASONS FOR AIR BUBBLE FORMATION ON LAMINATES

Uneven surface can cause
debonding and bubbles

Use of extremely large acrylic/
PVC laminate sheets (more than
8 ft x 2 ft long)

Insufficient pressure during
the bonding will look like this

High temperature and
humid conditions are
created to bond the sheets

When substrate
loses moisture after
installation

Use of water base synthetic
resin adhesive or any other the
PEVA (Polyethylene Vinyl Acetate
Co-polymer) is used.

CLASSIC

Wood is the New Black! Stay bold and always in style with our wooden laminates.
